- Federal ID: 83-3668975
- DOT: 3264062

Maintaining High Service Levels

- Quick to respond operations team for all pricing needs and tackling any questions.
- Highly selective carrier onboarding process ensures reliable capacity for any type of shipment.
- Automated driver location emails from start to finish for complete truckload visibility.
- Gain transportation market insight through regular meetings with account management teams.
- Experienced claims management team working for a fast resolution.

Service Offerings

Managed Transportation Services

RDT Solutions takes the hassle away from worrying about day-to-day supply chain management and allows our partners to simply worry about growing their business. We'll work as an extension of your team to provide solutions, day-to-day shipment management, and provide supply chain planning to navigate your business forward. Whether it's managing an entire logistics operation, vendor orders, or outbound shipments, we make it easy to do so.

Truckload

Truckload shipments are hauled on trailers up to 53ft in length and shipments weighing up to 45,000 lbs. Full truckload shipments usually travel as the only shipment on a trailer and are delivered on the same trailer that picks them up. The proper selection of the right carriers on their best lanes can maximize hard and soft cost savings. Depending on the freight and shippers needs, truckloads can be moved in enclosed Dry Van trailers, as well as open Flatbed trailers. Full truckload shipping is a truck that is dedicated and only carries freight from a single supplier.

Service Offerings

Warehousing

We provide the ability for short- or long-term freight storage at warehouses nationwide. Whether the purpose is strictly storage or storage plus order fulfillment, warehouses use specific elements that help manufacturers, distributors, and retailers monitor inventory and store it safely. With warehousing, comes the ability for transloading. We have the capabilities to transload cargo from trailers or containers, palletize, label, and ship back out for final delivery.

Container Drayage

Container drayage is the transport of containerized shipments. These shipments originate or conclude at port or rail terminals. Containerized shipments will move domestically via rail lines and/or move internationally to and from overseas.

Service Offerings

Expedited

If you ship freight, you know how it feels to be in a bind and need something delivered yesterday. With the new carrier driving time regulations and government mandates, it is becoming harder to get those rush items shipped. We have many options to meet your rush freight delivery requirements at a cost-effective price. Expedited shipments are often transported in cargo vans, box trucks, and trucks with team drivers.

Over-sized

The ability to carry a load that exceeds the per-axle limits, but not the overall weight limits. Examples include construction equipment, pre-built homes, containers, and other large industrial equipment.

Service Offerings

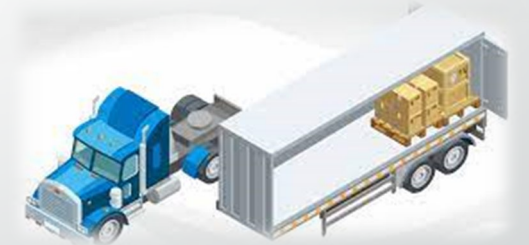

Refrigerated (Reefer)

An insulated, climate controlled and refrigerated trailer used to carry perishable items such as food or medical supplies.

LTL (Less Than Truckload)

Less-than-truckload or LTL shipments are used for the transportation of small freight or when freight doesn't require the use of an entire trailer. This shipping method can be used when freight weighs between 150 and 15,000 pounds. This freight shares trailer space with cargo from different suppliers, although is a great way to minimize transportation costs.

LTL makes up for the majority of B2B shipments throughout the United States. Many carriers operate LTL networks that consist of multiple points of consolidation and deconsolidation to complete each shipment.

Customer Onboarding

We are excited to work with you and your team to best manage your supply chain needs. From our well-trained staff, to our EDI capabilities of dispatching, tracking, invoicing and connecting through API. We offer services across the United States, Mexico, and Canada.

We can set your staff up with a login to our intuitive TMS Technology for you to analyze your company metrics through our reporting, review tracking updates on your shipments, manage accounting, as well as quote. Contact us today and let us know how we can help make your business grow!
